

# WESTPRO flotation machines

## applications

Westpro's versatile FLOTATION MACHINES are specially developed for a vast range of applications.

- Mineral separation
- Industrial minerals
- Soil remediation
- Environmental

## components

### 1. Heavy Duty Tank Construction

- Mild steel with optional coatings
- Stainless steel (optional)
- I-Beam support structure on larger models

### 2. Removable Wear Liners

- Rubber covered bottom liners
- Abrasion resistant side liners

### 3. Superstructure

- Supports mechanisms
- Provides air header for open flow models

### 4. Mechanism

- Heavy-duty spindle bearing assembly
- Heavy-duty bearings
- Low maintenance
- Heavy constructed standpipes
- Urethane or rubber impeller and diffusers
- Special coating of all wetted parts (optional)

### 5. V-Belt Drive

- V-Belt sets
- Sheave sets
- Drive guards

## advantages

- Heavy-duty construction
- Low maintenance
- Efficient operation
- Replaceable wear components
- Single or double overflow

### 6. Feed Box

- Welded to tank for no leak operation
- Includes wear liners

### 7. Transition Box

- Controlled weir bar assembly
- Controlled dart valve assembly

### 8. Discharge Box

- Controlled weir bar assembly
- Controlled dart valve assembly
- Discharge nozzle

### 9. Froth Paddle Assembly (optional)

- Direct drive
- Solid shaft
- Poly blades
- Bearing support blocks
