

Fines Removal Systems

The production of fine particulate solids is a concern in any aggregate plant. Westpro's Fines Removal Systems provide an efficient solution, eliminating the need for space- and labour-intensive settling ponds as well as providing reusable process water.

Westpro designs and manufactures complete turnkey fines removal plants for the aggregate industry, combining the company's range of dewatering process equipment.

- High Capacity Clarifier or Thickener
- Flocculant Mixing System
- Filter Press or Belt Filter
- Agitated Tanks for Clarifier Feed or Filter Feed
- Pumps
- Piping
- Electrical wiring and MCC
- Control System with PLC
- Structural supports (concrete by Others)

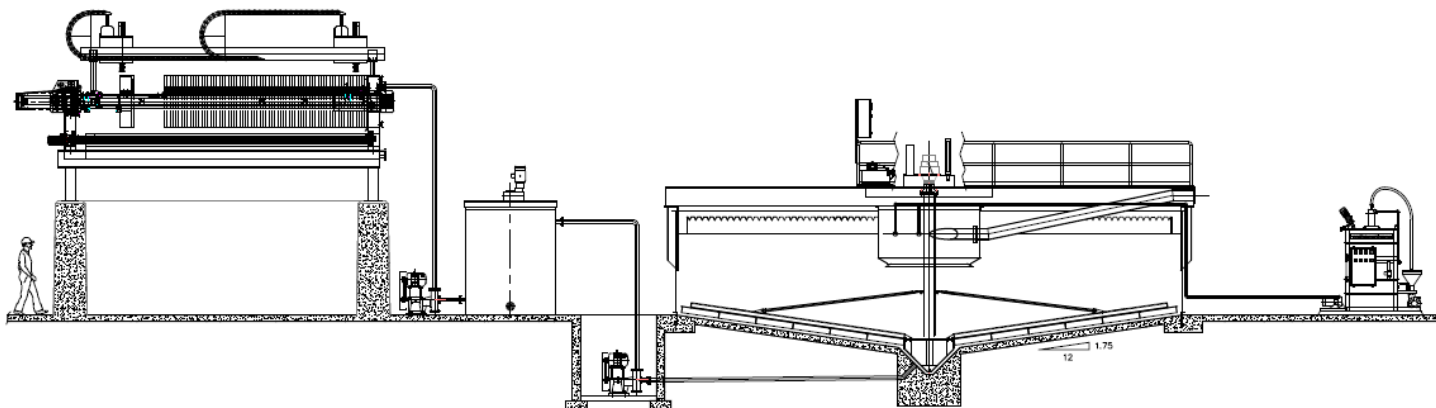

Fully Customizable Plants

The fines removal plants can be fully customized to your needs.

- Custom equipment design
- Custom plant layout for efficient space utilization
- Inclusion of supplementary equipment (such as hoppers, conveyors, baggers, air pollution control equipment)
