

Grinding Mills

BATCH BALL MILL

ADVANTAGES

- Ideal for low tonnage batch applications
- Compact and small foot print
- Economical solution for periodical fine grinding demands
- Long equipment life
- Low maintenance

AVAILABLE 16" TO 8' DIAMETER

BALL MILL

Westpro's Ball Mills ensure fine grinding of minerals and ore. Our Ball Mills are engineered to provide the most efficient solution for fine finishing.

ADVANTAGES

- Liners are less expensive than Rod Mill steel liners
- Ideal for fine grinding applications
- Easy grinding media handling

AVAILABLE 16" TO 15' DIAMETER

ROD MILL

As the first step in the grinding process, Westpro's durable and reliable Rod Mills provide excellent primary grinding of rocks and minerals.

ADVANTAGES

- Coarse grinding of up to 1in feed
- Ideal for primary grinding and open circuit grinding
- Longer life for grinding media.
- Most economical option for primary grinding
- Long lasting cast wear liners.

AVAILABLE 16" TO 15' DIAMETER
