

Portable Rotary Trommels

Westpro's line of portable process equipment is ideal for use in aggregate quarries, soil remediation projects and mining crushing systems. These self-contained units require no auxiliary equipment allowing for ease of operation in the field.

PORTABLE ADVANTAGES

- Heavy duty, durable construction
- Easily transportable behind a 1 ton truck or tandem dump
- Quick setup
- High stacking foldable discharge conveyor
- Road-worthy design with complete chassis assembly
- Adjustable hydraulic leveling legs
- Hydraulic and diesel power units (optional) eliminate the need for electrical power in the field

PORTABLE ROTARY TROMMEL

ADVANTAGES

- Easily transported around sites behind 1 ton truck
- Quick Setup
- Convertible to handle different products
- High stacking Discharge Conveyor
- Operational speed adjustable for different capacities
