

W19 Retrofit

NEW W19 RETROFIT

- BETTER PULP SUSPENSION
- SUPERIOR BUBBLE CONTACT
- ENHANCED BUBBLE GENERATION
- LOWER HP DRAW

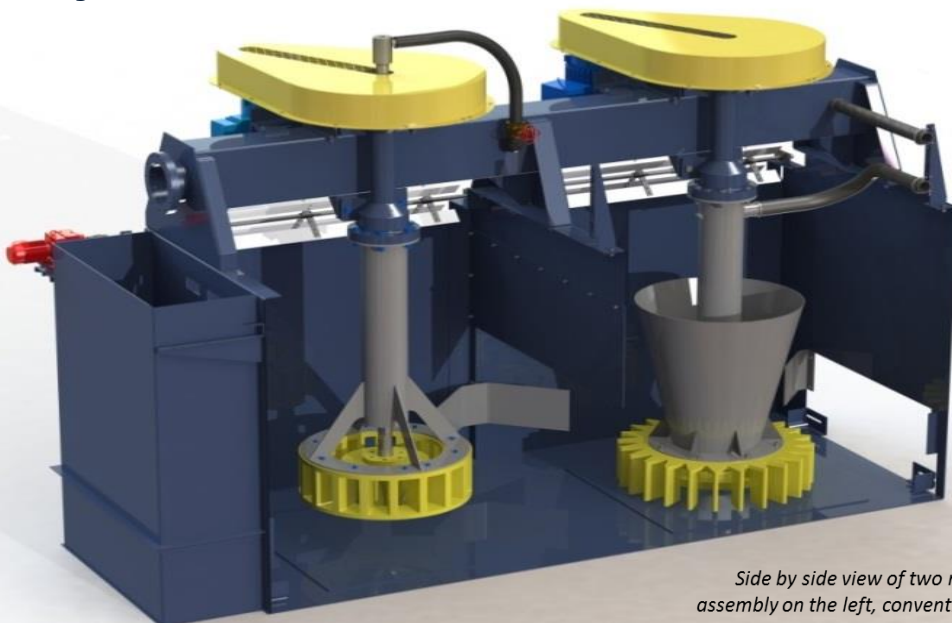

CONVENTIONAL FLOTATION UPGRADE

Westpro offers the option to boost the performance of an existing flotation circuit by retrofitting conventional cells with Westpro's W19 flotation mechanisms. Developed through extensive R&D, these mechanisms deliver superior flotation performance by focusing on:

- Energy Savings – Lower HP Draw
- Superior Slurry-Air Contact
- Improved Pulp Suspension
- Low Maintenance Operation

Westpro's W19 flotation wet-end mechanisms are designed to facilitate a simpler assembly and disassembly resulting in reduced man-hours required for equipment maintenance

Contact Westpro and find your process solution today.
