

WESTPRO

YOUR PROCESS TECHNOLOGY PARTNER

PRESS RELEASE

TH120HC Thickener in Ontario.

Westpro's High Capacity Thickeners have been installed throughout the world in many types of applications. The Westpro Advantage is the engineering team's capability of customizing the thickeners to provide the optimal performance along with extensive longevity. All thickeners include the latest technology in feedwell design and low drag high torque rake systems.

Westpro continues to supply their high quality products starting from engineering and design to manufacturing, final installation, commissioning and life cycle services.

To inquire about how Westpro can be Your Process Technology Partner please contact us at sales@westpromachinery.com.
