We are setting new standards in the industry

Discover our DT72-2 detention slaker with 17,000 kg/hr of capacity

## INNOVATIVE DESIGN AND CONSTRUCTION

Westpro's LSS470-DT72-2-AGT2525 [Detention Lime Slaking System] has a storage capacity of 470 metric tonnes. An exceptional choice for projects demanding both substantial capacity and tailored solutions

Engineer performing all our rigorous quality tests

# REVOLUTIONIZING LIME SLAKING TECHNOLOGY

Detention Slaker, DT72-2, being tested in Westpro shop

DT72-2 is capable of handling a remarkable **17,000 KG/HR.**

We provide ample retention time within the system to ensure proper slaking temperature and consistently high-quality slaking results.

Our Lime Slaking System includes a self-cleaning grit removal screw conveyor, enhancing the quality of your lime.

## PRECISE LIME FEED CONTROL

The Westpro PLC-based control panel is enhanced by an intuitive panel view display, allowing real-time process adjustments and exercising comprehensive control over the system. This synergy guarantees accurate and consistent lime dosing, optimizing the slaking process.
