WESTPRO ATTRITION SCRUBBERS: RELIABILITY AND EFFICIENCY IN HEAVY-DUTY MINING

SUCCESSFULLY DELIVERED TO MEXICO

ATTRITION SCRUBBER READY TO SHIP AT WESTPRO
SHOP

AS48DD-2 HAS AN OPERATING VOLUME OF
75 FT³/CELL

Our Scrubbers provide efficient slurry scrubbing solutions for applications in a variety of industries, including mining, frac sands, aggregates and soil remediation.

▶ The scrubber tank is constructed from heavy-duty reinforced carbon steel and includes rubber lining for wear protection, and replaceable rubber lined bottom cell liners.

▶ The easily removable drive units allow for high availability with ease of maintenance.

▶ Each scrubber cell contains a dual propeller mechanism with rubber lined props mounted on a high strength steel shaft with rubber lined spacers.

“We were able to adapt the client’s specific project requirements into Westpro’s standard product matrix. This ensured we could utilize Westpro’s proven Attrition Scrubber design and standard components for quick and efficient delivery.”-Project Engineer.
